

Key Ingredients of Tree Planting Projects

- ✓ **Source high quality trees** – 7-15 gal trees are optimal for volunteer planting, no circling roots
- ✓ **Right tree, right place** – carefully plan tree planting locations
- ✓ **Make it FUN** – organize to make it easy for sign up and show up
- ✓ **Teach volunteers** – use an arborist to demo and supervise proper planting
- ✓ **Tree stewardship** – water the trees routinely after planting and plan for long term care
